THE OLD STAR
DUSTER!

CB AND HAM GEAR

Is there something you need
and can't find in the catalog?
Please ask, we will do our best
to get it!

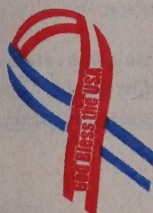

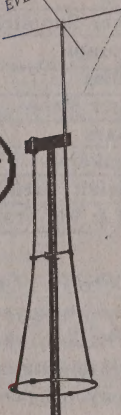

We will not be
undersold! We will
match or beat any price!

Please help us keep
our prices the **LOWEST**,
have your order ready
before calling!

**THE
ASTROPLANE
#LW-101**

ONE OF THE BEST
EVER MADE!

The CB radio has many useful purposes, not only for Truckers, but for anyone wanting to keep communications open without land lines. On the road they can help you avoid traffic jams, speeding tickets, or call for road side assistance. In the home they can be used for disaster assistance or just plain fun!!

BEFORE YOU ORDER!!

- 1) Please have your customer number ready when calling.
- 2) Write down your order with page numbers and item numbers.
- 3) Give item number and then quantity.
- 4) If paying by credit card have it out and ready.

Want to contact us online? Use the following addresses for help or additional information.

Questions: questions@hyelectronics.com
Orders: orders@hyelectronics.com

DURING YOUR ORDER!!

- 1) Write down the amount of the COD
- 2) All COD's orders under \$750.00 are shipped FEDEX currency only

AFTER YOUR ORDER!!

- 1) All orders are shipped the next day as long as items are in stock.
- 2) Tracking numbers are NOT given on the 1-800 number.
- 3) Most importantly...Enjoy your new items!!

We will match or beat any price out there!
WE WILL NOT BE UNDERSOLD!!

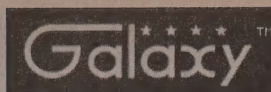

Please refer to this listing as an ESTIMATED time of delivery. Remember that all orders go out the next day!! Calculate from that day NOT INCLUDING WEEKENDS OR HOLIDAYS!

AM/FM/USB/LSB/CW

WE WILL NOT BE UNDERSOLD!

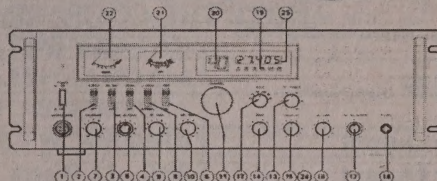

CALL FOR PRICING!

Specifications:

Frequency Range: 28.765 - 29.205 MHz
Emission Types: CW/FM/AM/USB/LSB
Frequency Control: Phase - Locked - Loop Synthesizer
Frequency Tolerance: 0.005%
Frequency Stability: 0.003%
Temperature Range: -30 C to +50 C
Antenna Impedance: 50 Ohms
Antenna Connectors: Standard SO-239 type
Meter #1: RF Output Power / Antenna SWR
Meter #2: Received signal strength / MOD %
Input Voltage: AC 120 V, 60 Hz

Controls / Indicators:

Additional Features:

- *AM, SSB and PA Modes
- *LED Channel Indicator
- *Green/Red LED Indicator for RX/TX
- *1/4" Headphone Jack on Front Panel
- *Noise Blanker with On/Off Switch
- *Dimmer Control with On/Off Switch
- *Receive Gain Control
- *Mic Gain Control

Galaxy Premium Features:

- *New Style Midsize Chassis:
(4-3/4"H x 11-1/4"W x 13-1/2"D--12 lb)
- *Operates on both AC and DC
- *Six Digit Frequency Counter
- *Large, easy-to-read Meter with 4 Scales:
1) "S" Meter indicates up to 60 dB over S9
2) Modulation Percentage Scale for use on AM
- *3) Power Scale Calibrated for AM and SSB
- *4) SWR Scale
- *Automatic SWR Circuit
- *Talkback Circuit with On/Off Switch and Volume Control

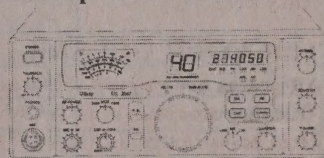

Frequency counter!!!

Roger Beep!!

Talkback!

Flip Down Front Feet!!

- *Variable Power Output Control
- *Roger Beep with On/Off Switch and LED Indicator
- *Galaxy Noise Filter for use on weak signals
- *High SWR Alert LED Indicator
- *Instant Access to Channel 9 or 19
- *Receive Clarifier with On/Off Switch
- *Flip-Down Front Feet
- *Powered Pin on Mic Jack
- *Complete Service Manual including Schematic
Diagrams enclosed with each radio (in addition to the standard operating manual)
- *Two Year "Manufacturers" Warranty

Universal Buffer Fan
Can be used in most Radios
& Transmitters

A SIDEBAND RIG WITH A FREQ COUNTER AND
TWO 2SC2290 OUTPUT TRANSISTORS!

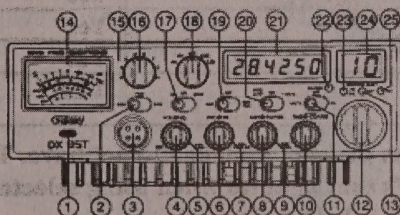

NOTEWORTHY FEATURES:

- *A High-Performance output circuit that uses two Toshiba 2sc2290 power transistors to generate 50 watts for AM/FM and 150 watt for SSB operation.
- *Chassis incorporates a solid aluminum finned rear section as a heatsink
- *Additional heatsink on the bottom of the radio with an internal Micro cooling fan increases the radio height from 2.5 to 3 inches
- *Same main circuit board as our DX 2517, DX93t, DX48t and DX45mp
- *"STARLITE" faceplate is matte black with all lettering backlit in green and blue
- *Switchable sixth digit provides five or six digit display
- *Our exclusive "SUPERSLIDER" circuit maximizes frequency control by switching the fine clarifier between receive/transmit and receive only operation or completely out of the circuit with one slideswitch. The coarse clarifier operates on both receive and transmit unless the SuperSlider switch is off. When switched off, both clarifiers are out of the circuit.
- *Retro-look red modulation lamp(with on/off switch) flickers like the old neon lamps of the Fifties and Sixties.
- *Front mic jack
- *Variable powered output control
- *Red channel and frequency digits
- *Heavy duty DC power cord

STRANGE AND UNUSUAL FEATURES:

- +The echo has internal controls only. It is our famous dual control circuit without any controls on the front panel. The ON/OFF switch is there, but to adjust the echo sound, the bottom cover must be removed. Locate the rectangular metal box containing the echo board. DO NOT OPEN THIS BOX, use a small plastic tuning tool to gently adjust the trimmer pots inside the hole marked "ECHO" and "TIME". These pots are somewhat fragile so it is best not to use a metal screwdriver.
- +A single slide switch controls both the Echo and the Roger Beep. They can both be off, but they cannot both be on at the same time.
- +There is no receive gain pot. A 40db attenuator switch takes it's place.

D-636L Classic Edition

\$29.95
\$24.95(6lot)

The 636L is a noise canceling dynamic microphone that was designed for close talking handheld applications in CB, amateur Radio and SSB communications. The 636L is used in situations where there is high background noise levels, such as trucks. The 636L has a rugged housing, polyurethane coated steel grille screen and a dependable low impedance dynamic element. The frequency response is tailored for maximum intelligibility and clarity in voice communications with a 360 degree minimization of background noise. A soft lip guard is positioned to assure proper close talk spacing by the operator. Molded in high impact Cyclocal, the 636L comes with a six wire coil cord which allows for relay, electronic or virtually any type hook up with almost any transmitter/transceiver.

D104-M6B
\$42.95

Ceramic Power Mic

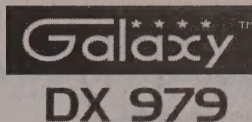

The Astatic D104M6B and D104M6C are the handheld version of the D104 desk mic. Rugged for harsh mobile environments, the D104M6B and D104M6C have an attractive chrome plated grille just like its "Big Brother" with a tough ABS housing, transistor amplifier and external gain control. It uses a standard 9-volt battery. The D104M6C has a polished chrome front housing.

NEW AND IMPROVED!

This microphone is the ultimate for Base Station Operation. It has a high gain amplifier (55db) and a volume compressor, which makes it different to any Conventional Microphones used up to now. It features a high controllable output that is able to fully modulate any type of transmitter. You can monitor the level of youe audio and check Battery Level with the standard Meter mounted in the case. This is a top shelf Microphone and Base Equipment is getting harder to find. Take a close look at this mic.

SPECS: frequency
response: 250hz-8khz

*Standard Astatic color coded 6 wire cable

for 4, 5, and 6 pin wiring

*Requires a 9 volt battery or external power

*Full color gift box

BASE MICROPHONES

ADONIS

#AM-7500E

The AM-7500E is the ultimate base microphone for use with any two-way radio (amateur, citizen band, commercial, etc.). The AM-7500E features a 3 stage compressor amplifier, 4 band graphic equalizer, rotary output volume control, momentary and locking PTT switches, up and down frequency (channel) controls, angled VU meter, a flexible metal gooseneck microphone with a high sensitivity electret element, and much more. The AM-7500E's compressor amplifier has 3 stages to select from - High, Med and Low compression levels. This high quality compressor amplifier optimizes the transmitted audio levels and keeps them constant, without distortion, regardless of the audio input level. The High position (45dB) allows the operator to talk in a low voice or at a distance from the microphone. This position requires a quiet environment for proper use. The Med position (30dB) is the optimum position for normal contacts and operating conditions. The Low position (10dB) is for high noise environments and requires the operator to speak close to the microphone so that background noise is not transmitted. The AM-7500E's graphic equalizer allows custom tailoring of your transmitted audio. The 4 band graphic equalizer has center frequencies at 270Hz, 540Hz, 1000Hz and 2000Hz. This provides the best audio quality for FM transmissions and maximum efficiency for SSB and AM DX transmissions. The unattended transmit warning circuit is an Adonis exclusive. If the radio is accidentally kept in the transmit mode for over 2 minutes, without any microphone audio input, the AM-7500E sounds an audible alarm (this alarm is not heard over the air). If the alarm is not responded to in approx. 30 seconds, the AM-7500E automatically switches the radio to the receive mode. A great feature that helps protect your valuable radio equipment. If not needed, the unattended transmit warning circuit can be disabled. Other features include a battery check circuit where the VU meter momentarily measures battery life, up and down frequency (channel)

controls, on-a(transmit) LED indicator, and momentary and locking PTT switches

\$229.95

- *HIGH SENSITIVITY ELECTRET ELEMENT
- *3 STAGE COMPRESSOR AMPLIFIER
- *4 BAND GRAPHIC EQUALIZER

Classic Edition

The 636L is a noise canceling dynamic microphone that was designed for close talking handheld applications in CB, amateur Radio and SSB communications. The 636L is used in situations where there is high background noise levels, such as trucks. The 636L has a rugged housing, polyurethane coated steel grille screen and a dependable low impedance dynamic element. The frequency response is tailored for maximum intelligibility and clarity in voice communications with a 360 degree minimization of background noise. A soft lip guard is positioned to assure proper close talk spacing by the operator. Molded in high impact Cycloc, the 636L comes with a six wire coil cord which allows for relay, electronic or virtually any type hook up with almost any transmitter/transceiver.

#BB-3

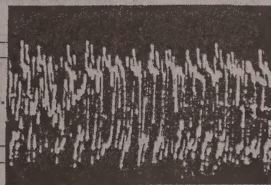

\$21.95**\$17.95****(6 LOT)****TURBO EFFECTS**

This echo board is designed to run on either 13.8 volts or 8.55 volts. It will operate best at 9 volts. So choose the appropriate power source. It also has a 30db gain audio amp onboard. Adjust this pot for maximum forward swing. Notice pop-off module for inboard or externally mounted controls. The external control pot is designed to fit in smaller spaces provided by the modern radio. Please note that when the echo board is first activated effects are on full. To reduce effect, turn knobs clockwise.

#DSP

DYNAMIC SPEECH PROCESSOR**\$33.95**

BEFORE PROCESSING

AFTER PROCESSING

HAVE YOU EVER WONDERED WHY EVERY AM OR FM ROCK BROADCAST STATION ALWAYS SOUNDS SO LOUD, OR WHY THE SOUND PORTION OF TV COMMERCIALS ALWAYS SEEMS LOUDER THAN THE PROGRAM ITSELF? THE REASON IS THAT SMART BROADCASTERS USE EXACTLY THE SAME POWERFUL PRINCIPLES OF AUDIO PROCESSING THAT ARE NOW AVAILABLE TO YOU WITH THE DYNAMIC SPEECH PROCESSOR

#ASTE1

No Exchange**PARTS****No Returns on parts****MULTI-COLOR FLASHING LEDs**

The MCF-LEDs install just like any other normal 2-lead LED, but the MFC-LEDs feature an on-board controller and multiple color lights. Switch out boring single color LEDs with an MFC-LED and watch the light show! They will automatically change color and patterns. Use to customize vehicle interiors, electronic equipment, 2-way radios, and anywhere else you want a little flash. Install MFC-LEDs in new applications or replace standard LEDs and lamps for a unique look.

ASTATIC METERS

#AST-600

\$99.95

5000 WATTS!

- M1 Standing Wave Ratio Meter
- M2 RF Power Meter
- M3 Modulation SWR Meter
- S1 REF/FWD Switch
- P1 SWR Control
- S2 Power Scale Switch
- P2 Modulation Control
- S3 Modulation Set Switch
- S4 Lamp Switch
- S5 Peak/Avg. Power Switch

The Astatic 600 is a 3 meter SWR/PWR/Modulation Meter. This is a heavy duty meter that will handle a full 5000 watt load capacity. It is just great for mobile, bench, or base station installation. Each meter is lighted to add to it's readability in any work environment. 9.75" W x 4.35" D x 4.25" H.

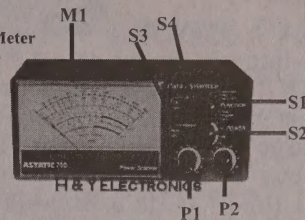

Features: *4 power settings, *Reads REF. & FWD, *Freq. Range: 25-30 MHz, *Impedance 50 Ohms, *Accuracy SWR 10%, *RF Power 7% on 0-10W, 10% on 100W & 5000W Scales, *Mod. 10%.

#AST-700

\$99.95

5000 WATTS!

- M1 Standing Wave Ratio Meter
- M2 RF Power Meter
- M3 Modulation SWR Meter
- S1 REF/FWD Switch
- P1 SWR Control
- S2 Power Scale Switch
- P2 Modulation Control
- S3 Modulation Set Switch
- S4 Lamp Switch
- S5 Peak/Avg. Power Switch

Need a good extra large heavy duty 5000W meter? Then this is the meter you have been looking for. A 4" x 6" easy to read meter for simultaneous examining of all functions makes this one ideal for Bench use. 10" W x 4.5" D x 4" H. Heavy duty case make this unit tough and durable.

Features: *Lighted Meter, *Variable Power Scale, *FWD Set, *REF/ MOD Set, *Freq Range: 25-30 MHz, *Impedance 50 Ohms, *Accuracy: SWR 10%, RF Power 7% on 0-10W, 10% on 100W, 1000W, & 5000W, *Mod 10%.

WHICH ANTENNA? The Antenna Wars started a long time ago, when Antenna Specialist made the **BIG MOMMA** Antenna with a 48" whip, then came the **EM-145** with a 59" whip. The **K-40** was next with a 60" whip, the **WILSONS** with a 66" whip and the **BIG BUBBA** followed with a 76" whip. And now the **Z-180** is here! It has a 77 1/2" whip! **WHY?** Everyone soon learned the longer the whip the better the ears and signal. Only the best antennas have **USA CARBON STAINLESS STEEL WHIPS WITH TIPS**. All the big antenna people such as K-40 and Wilson know the longer the whip the, the more Db gain, better ears and clearer and louder sound.

- *Made with high impact Mobay Thermoplastic
- *17-7ph tapered stainless steel whip
- *Freq range 26mhz to 30mhz
- *2 year guarantee

66"

WHAT IS POWER GAIN?

Antenna power gain is the amount of improvement in power amplification over another antenna. The higher gain antenna will transmit and receive farther, but the actual distance will vary depending on the gain, ground terrain and other factors of the enviroment. Individual test results may vary upon actual use on some installations due to the vehicle ground plane and matching configuration.

MOBILE ANTENNAS

#K-40T TRUCKER ANTENNA

WILL OUT PERFORM
ALL THE OTHERS!

CALL FOR PRICING!
WE WILL NOT BE UNDERSOLD!

9 Times more surface area means you talk farther, come in louder and receive better. There's a simple reason why the K40 Trucker packs more transmission punch than other antennas. We maximize an electrical characteristic call *skin effect*. At radio frequencies, practically all of the electrical current in an antenna coil flows near the surface-or skin-of its conductor wires. So by maximizing the total surface area of the conductors, we can maximize skin effect. The total surface area in the K40 Trucker is 9 times greater than that of the single wire other antennas use. That's because we use what's know as a Litz wire configuration, where 660 individual wires are bunched together. The result is the K40 Trucker, the antenna with greater transmitting and receiving power.

#K-30 Mag. Mount Antenna

#K-30WHIP **CALL FOR PRICING!**
WE WILL NOT BE UNDERSOLD!

The K-30 is the antenna for the CB'er who wants the maximum amount of performance from their antenna, but in a smaller, more convenient design.

The K-30 offers that same consistent high quality and dependability you've come to expect from K-40 Electronics. Plus, the effortless mounting and removal of the K-30 makes it the ideal 10 oz heavy antenna for multi-car families duty magnet and leased or rented vehicles.

#K-40Whip

BACK BY POPULAR DEMAND!

This is the one, the only K40 antenna. Computer designed means that it is constant in design and performance. Other antenna are hand wound, hand soldered and hand glued. With so much variation, no two can be exactly alike. Every K40 is exactly alike, in construction and mostly important performance.

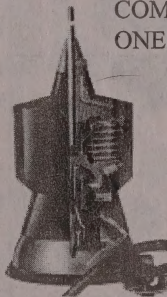

The whip is designed to withstand extreme shock obstructions without breakage. Made in the USA.

This antenna is made with better materials and by professional people so it is designed right. You can fix the K40 on to any mounting surface. It will fit any vehicle you own. That includes choppers, dune buggies, gutters, mirror mounts, luggage racks, trunks, hatchbacks, semis, pick-ups, and RV's.

Specifications: Frequency range: 27 MHz, SWR: <1.2, Type: 1/4, Power maximum: 250 Watts PEP, Length: 153 centimeters, Mount: Coffre.

Silver Load Tunable Tip Fiberglass

Antennas

Wilson Stick Antennas

The best stick money can buy. These antennas are proven to be the best by truckers the world over. They feature a long solid fiberglass rod with standard 3/8 x 24" threads. Wilson antenna's impedance matching transformer allows for more complete transfer of power to radio from radio to antenna. Fully linear top loaded for maximum transfer of power out of antenna (better than Helical winding). 18 gauge silver plated wire to reduce resistive losses. Made by Wilson.

 VANS, AND CAMPERS**

#B-10000 \$36.95

*The New Stainless
 Steel
 "Night Hawk"*

10,000 Watts Mobile Antenna This could just be the world's best mobile coil antenna. A solid stainless steel construction from top to bottom makes this antenna Tough, Durable, & Weather Resistant. Covers all operating bands AM/FM/SSB/CW, 10 & 11 meter, and is broad banded to cover those extra channels without running the VSWR off the scale. The Open Helix Coil keeps the antenna cool while running 10,000 Watts of raw power, and adds punch to the radio signal, and gives this antenna a super high dB gain. Mounting is a standard 3/8" x 24" threads. Overall length is 5 ft. 6 inches. The ring at the bottom acts like a ground plane and makes this antenna get out like a booming base. This antenna is just right, not too tall, the coil is not too large, and at this price it is a steal, but the performance of this antenna is far beyond any of its competitors.

\$9.95

The DIAL-A-MATCH series has a unique design which allows field tuning and mounting in any configuration with a simple twist of the tuning collar. Retuning is made easy by simply adjusting the split collar to the same SWR. All metal parts are 17-7 ph stainless steel or triple chrome-plated brass for long lasting service and beauty. The DIAL-A-MATCH coil provides 5/8 wave efficiency by utilizing a special core material wound with heavy 14-AWG solid copper wire. Fits standard 3/8 x 24 mounts.

MOBILE ANTENNAS

Half Breeds

The rugged base loaded stainless steel mobile antennas **rated at 1500 watts of power**. All three base models feature high quality 17-7 ph stainless steel rods that fit securely into a fiberglass coil. The coil is precision wound with 16 gauge solid copper wire, then sealed against moisture with your choice of black or white shrink tubing. The construction process eliminates power failure and keeps static to a minimum. **Standard 3/8" x 24 ferrule. VSWR typically 1.5:1 over 40 channels.**

Small but deadly. Hide this one anywhere space is limited. This antenna gives amazing performance much better than most base antenna available today. Designed to work just about anywhere, for base operation, it can be mounted high on a mast, inside an loft or attic or even a balcony. It can also be used at apartments and trailer parks. It has a black fiberglass whip and a slim design won't cramp your style when mounted on a vehicle. Supplied with hardware for easy mast mounting. It's no ground operation is perfect for the new fiberglass trucks, the good old reliable ones too, campers, & RV's. Boat & marine operation also. **Technical Specifications:** Frequency range: 27 MHz, Number of Channels: 200, Maximum pwr: 500 W, Minimum SWR: 1/1.2, Gain: 9 dB, Capacity: 500 watts, Weight: 750 mm, Length: 1000 mm, **No Ground Required-Ideal, No SWR Adjustment, Fully Water-Proof, Low Wind Resistance**

BASE ANTENNA

#PAT-12

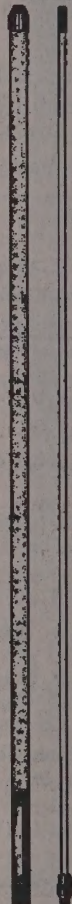

\$31.95

2000 watts!

NEW!

The PAT-12 antenna is a voltage fed design. This highly efficient antenna is unique in that the top section is lightly loaded to shorten its electrical length. By doing so we have eliminated the use of a center section used by other manufacturers without compromising its performance. Rugged fiber-glass construction with chrome plated ferrules, this two-section omni-directional 1/2 wave base antenna has single coil circuitry for optimum tuning and reliability. 2000 watt PEP sleeve tunable it will work on 10 or 11 meters. Extremely easy to install and operate, and comes with all mounting hardware. UPS shippable

Antron 99 Base Antenna

Note: This is the real thing, not a fake. There are others out there calling themselves the A-99. But they don't have the adjustable rings, the ears, or the performance of the real thing. The A-99 is the best base antenna around! **Ham - CB - Commercial.** Protects up to 14,500 volts, Twin ring "adjust-a-match" tuning for low SWR, 18 feet tall, 3 six foot section, Half-wave CB base antenna, ground radials, Easy to assemble and install.

IMAX-2000

By Solarcon

New High

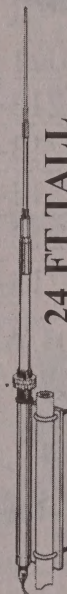

Performance 5/8

Wave Base Station Antenna

INTRODUCTORY PRICE

\$105.95 6 lot \$99.95

New CB and Amateur base antenna. It has an end fed 5/8 wave length radiator with extended I-max (current Maximum) center section, Radials are not required. A new mounting system makes it user friendly. The antenna and hardware can be assembled on the ground and easily slipped over the mast or tower top when up in the air. No more having to hold the antenna and deal with two loose mast clamps to the same time. Wide bandwidth and high power handling capabilities. Broad band, typically 3 MHz wide under 2:1 VSWR, Best 5/8 wave design available, SWR: 2.1, Frequency range: 26-29 MHz and can be moved up or down by tuning rings. Tested at 5000 watts and is rated for all legal power. It is 24 feet long when assembled.

ROTATORS

#HDR-300A

\$1359.95

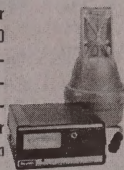

The HDR-300A is for King sized antenna arrays up to 25 square feet wind load area. Control cable connector, new hardened stainless steel output shaft, new North or South centered calibration. New ferrite beads on potentiometer wires to reduce RF susceptibility, new longer output shaft keyway for added reliability, heavy-duty self-centering steel mast clamp and hardware. Digital display accurate to 1 degree. Machined steel output.

#HAM-V

\$899.95

The HAM-V is the rotator for the new millenium! It is designed for medium communications antenna arrays of up to 15 square feet wind load area. Includes the innovative DCU-1 Pathfinder Control Unit. A new alloy ring gear with 100,000 PSI Tensile strength and a new indicator potentiometer have been added for improved reliability! No more terminal strips! New Cinch connector plus 8-pin plug at control box - no screwdriver required. New powder coated finish. Maximum mast size of 2 1/16 inches. It operates at 110V.

#HAM-IV

\$599.95

The HAM-IV is the most popular rotator in the world! It is designed for medium communications arrays of up to 15 square feet wind load area. New low temperature grease permits normal operation down to -30 degrees F. New alloy ring gear gives extra strength up to 100,000 PSI for maximum readability. New indicator potentiometer, new ferrite beads reduce RF susceptibility, new cinch plug connector plus 8-pin plug at control box. The HAM-IV has dual 98 ball bearing race for load bearing strength and electric locking steel wedge brake prevents wind induced antenna movement. North or South center of rotations scale on meter, low voltage control maximum mast size of 2 1/16. It operates at 110V.

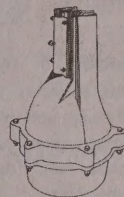

#T-2X

Tail Twister Rotar

\$699.95

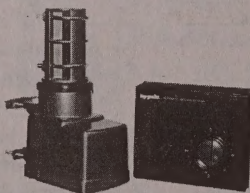

The Tailtwister Series II is designed for medium communications antenna arrays of up to 20 square feet wind load area. Available with DCU-1 Pathfinder digital control box (T2XD) or standard analog control box (T2X). Low temperature grease, alloy ring gear indicator potentiometer, ferrite beads on potentiometer wires, new weatherproof AMP connectors plus 8-pin plug at control box, triple bearing race with 138 ball bearings for large load bearing strength, electric locking steel wedge brake, north or south center of rotation scale on meter, low voltage control, max mast of 2 1/16.

#AR-35

\$79.95

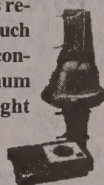

The AR35 is for small UHF/VHF antennas, 6 meter beams and loop antennas. Auto control unit-(7w x 6d X 21/2h in.) 110 VAC operation Rotator is 4w x 9d X 103/4 in. Includes all mounting clamps and hardware.

#AR-40

\$319.95

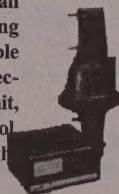

The AR-40 is for large FM-TV and compact communication antenna arrays up to 3 square feet wind load area. Dual 12 ball bearing race is exclusive to its class. Automatic position sensor never needs resetting. Fully automatic control — just dial and touch for any desired location. Solid state, low voltage control, safe and silent operation. It has a maximum mast size of 2 1/16 inches. Includes MSLD light duty lower mast support. Operates at 110V.

#CD-45II

\$389.95

The CD-45II handles 8.5 sq. feet mounted inside a tower, or 5 sq. ft. with mast adapter. Low temperature grease good to -30 F degrees. Bell rotator design gives total weather protection, dual 58 ball bearing race gives proven support. Die cast ring gear, stamped steel gear drive, heavy duty, trouble free gear train. North center scale, lighted directional indicator, 8-pin plug/socket on control unit, snap-action control switches. Low voltage control Safe operation, takes masts to 2 1/16. MSLD light duty lower mast support. Operates at 110V.

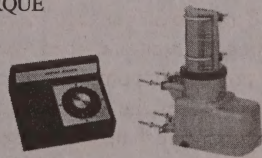

#AR-300XL

\$99.95

AUTOMATIC ANTENNA ROTOR

- *360 DEGREE ROTATION WITH MECHANICAL STOP
- *70 SECOND ROTATION TIME
- *192LBS OF ROTATION TORQUE
- *99LBS VERTICAL LOAD
- *10LBS WEIGHT

Great for small beams like the M-103c, V-Quad and the Y-Quad!

**Best of the Exports Vol. 4
 Amps Addition
 BK-4
 \$19.95**

Best of the Exports, Amps Edition Vol. 1. This book is sure to be a keeper. Explicit information on amps that others would only talk about. This book is a unique and wonderful source of rare information unobtainable elsewhere. Information in this volume includes: dimensions, transistor compliments, power input, power output, max current, keying circuits, service manuals, plus schematic and a schematic key so you can read the schematics. Picture specifications, installation instructions, circuit descriptions, features, and the list keeps going. All this is in the book plus a lot more and it explains all in nontechnical detail so anybody can understand. If you own amp, thinking about buying an amp, build amps, or just like to keep up with what is going on in the CB world, you must have this book. Once you get it, you will wonder how you made it without it.

CB World Book Vol. 1

BK-401

\$24.95

If you are a Mr. Fix It or know some one
that is you need this book!

This sensational 64 page book is the talk of the CB world. With the wave of export equipment filling the CB world, there was a great need for an international exporting guide for RF transmitting equipment. CB'ers asked for it and CB World answered. This book is just packed full of pictures, drawings, and great information. It has instructions on how to build your own amp complete with pictures and drawings. Parts lists, printed circuit board details, and schematics. Modification of CB radios is a simple task with this book at your side. Modification for channels, power, clarifier, and more. This book has tech notes like the old Sam's Photo Facts, and information like the old Secret CB Books. Plus pictures, specs, and reports on Solid State and tube amplifiers. If you have tried in the past to grasp what it is all about, but just couldn't get it then this is the book for you.

CB World Book Vol. 2

**The Winning CB Story**

By: Double R from Valley View TX.

In the late 80's I worked for a large gold and silver company as a traveling assayer/lease agent, my travels took me mainly through Arizona and New Mexico. A lot of time was spent in New Mexico, mostly around Roswell and Ruidoso. I was equipped with the hilt with guns, knife, a sword, metal detector and an old Courier chrome handheld walkie-talkie with a new extended rigid stainless steel antenna. Behind Ruidoso, in the Capitan mountains, I was following Montezuma's trail looking for the lost Jessup/Varo mine, with a beard that would rival ZZ Top and the physical appearance of Grizzly Adams, I was a formidable sight! Going up a steep hill to look by a waterfall, I ran right into the path of a Black Bear, not wanting to be a living horderve, my legs started churning dirt downhill. I remember my only thought was "Feet don't fail me now" among many *%&\$# words! Why I grabbed what I did, I still don't know. Not a gun, not my sword, but the dad-gum walkie-talkie, as I ran down that hill without looking back I had the Courier in my left hand poking backward with that long antenna. As I dove into the bed of the pick-up and looked back to see (who knows what was going thru the bear's head) I thought I saw a smile as he was still atop the hill looking at me. All this happened just like I say, (I did embellish some words to make the story longer) but now when I go places like that I carry an automatic 12 gauge with slugs.

COMPANY TERMS AND POLICY - PLEASE READ BEFORE PURCHASING

Possession of this catalog does not constitute or guarantee a sale, or that all items are in stock. The following company policy and terms should be read before purchasing any of the equipment in this catalog. At the time of placing a order, if you do not state that you disagree with our company's policy and terms, it shall signify your acceptance of our company's terms and company policy.

LEGAL DISCLAIMERS: H&Y is not responsible for lost, stolen, or items damaged during shipping. As a distributor, H & Y reserves the right not to sell to non dealers. As H & Y has no control over the end use or over the purchaser, the company assumes no liability for any conversion or use or practice that may be in defiance of local, state, or FCC regulations or said to be illegal use by the FCC.

Internet Disclaimer: H & Y is not responsible for any inaccurate information posted on the H&Y Web Page.

Responsibility Disclaimer: No liability is assumed or implied for typographical errors in this catalog or on the web page.

As manufacturers may, and often do, change their design, parts values, tubes, transistors, or power ratings with any assembly run, and due to the fact that this is beyond our control, pictures, specs, and power values may vary from the actual product as presented in this catalog or on the web page. For such changes H&Y can not, and does not, imply or assume any responsibility for such changes. Every effort has been made to limit such errors. H&Y is not responsible for manufacturer's policies changes.

WARRANTY: H&Y makes no representations or warranty beyond that of the warranties of the applicable manufacturers. Defective item returns are made to the manufacturer under the manufacturer's terms and conditions, not to H&Y.

Manufacturer's Warranty Restrictions: Any unit that has been modified, converted, misused, abused, worked on, played with, or used illegally, voids all factory warranties. Due to manufacturer's policies H&Y cannot accept returns on the following items for exchange, refund, replacement, or credit FOR ANY REASON. Books, VHS Tapes, Transistors, Radio parts, and imports from over seas. Additional items may be added to this list as: manufactures policies change, manufacturer stops making item, manufacturer goes out of business, or in the case of specially ordered items. NO WARRANTY IS IMPLIED OR GIVEN BY MANUFACTURE OR H&Y on the following items FOR ANY REASON AT ALL. Mirage radios, Super Star radios, Euro 3900 radios, transistors, tubes, Sadelta, and overseas imports. Additional items may be added to this list as; manufacturer's policies change, manufacturer stops making the item, or the manufacturer goes out of business.

SHIPPING POLICY: All COD orders under \$750.00 are shipped Fed-Ex currency (cash). All original shipping charges are the customer's responsible. H&Y does not refund original shipping charges. Customer is responsible for all shipping charges back to H&Y. H&Y reserves the right to refuse to ship to customers who have refused shipments and have not paid the lost freight. H&Y reserves the right to charge all original shipping charges plus 15% restocking fee to all refused orders.

RETURN POLICY: NO ITEM WILL BE ACCEPTED WITHOUT A RA NUMBER. You must call H&Y and get a RA number before you can return an item. Customer is responsible for all shipping charges on return items. ITEMS MUST BE RETURNED 100% COMPLETE! Item must contain ALL original boxes and packing materials, contain all manuals, blank warranty cards, and other accessories and documentation provided by the manufacturer. THE Original BOX MUST NOT BE WRITTEN ON OR DAMAGED. The original box should be placed into another box. ONLY the outer box should have any writing on it. WE reserve the right NOT to refund any unit based on condition or manufacturers implied warranty. THERE IS NO RETURN ON FOLLOWING ITEMS IF THEY HAVE BEEN HOOKED UP AND USED, OR PLAYED WITH. Microphones, radios, transistors, tubes, radio parts, amp parts, and overseas imports. Additional items may be added to this list as; manufacturer policies may change, manufacturer may stop making item, manufacturer goes out of business, or in the case of specially ordered items.

PRICING POLICY: Prices are subject to change without notice. For all prices, products and offers, H&Y reserves the right to make adjustments due to changing market conditions, product discontinuation, manufacturer price changes, errors in advertisements and other extenuating circumstances. H&Y reserves the right NOT to give price protection.

POLICY NOTES: H&Y reserves the right to drop names from it's mailing list and stop mailing to them.

IF YOU RECEIVE A DAMAGED PACKAGE, CONTACT YOUR LOCAL UPS OFFICE IMMEDIATELY.

There is no refund or exchange on close out items. All sales are final on grab boxes. All sales are final, there is no refund or exchange on special sales, or special order items. All orders are subject to a \$2.00 to \$ 8.50 service and handling charge in addition to carrier's charges.

CREDIT CARD ORDERS; All information, name, address, card number, and expiration date must match exactly what the credit card company has or orders will be cancelled without notification.

THESE TERMS AND CONDITIONS SHOULD BE READ. WHEN YOU PLACE A ORDER FROM THIS CATALOG, YOU IMPLY THAT YOU AGREE WITH ALL THESE TERMS AND CONDITIONS AS STATED HEREIN.
